In recognition of Childhood Obesity Awareness Month

Our Vision:

The Picture of Health Foundation, Inc. is a 501(c)(3) non-profit organization designed to provide communities with education that empowers people to live and stay healthy. We do so by teaching the benefits of healthy lifestyle management; using a balanced approach to medical, mental and physical wellness. Through the POHF wellness team of experts, we provide communities with access to researched based health and wellness information, screenings, and physical fitness opportunities. Our wellness team of experts consist of: Medical Doctors, Physician Assistants, Nurse Practitioners, Registered Nurses, Medical Assistants and Fitness Coaches.

Our Mission:

To serve communities at risk for metabolic syndrome, a self-induced disease caused by obesity and inactivity. It is our belief that communities armed with the knowledge of good nutrition, mental health awareness, and physical activity will significantly improve their quality of life.

In recognition of Childhood Obesity Awareness Month

Our Method:

Join us in the Fight Against Childhood Obesity, and Burst N2 Fitness! The PHOF Burst N2 Fitness 5K Bubble Run is one of our events designed to promote physical activity for everyone in the family. All who attend receive personal training tips and dietary nutrition information.

Approximately 17% (or 12.5 million) of children and adolescents aged 2—19 years are obese. Childhood obesity has quickly become a leading preventable cause of death and illness in children. Many overweight and obese children suffer from dangerous, debilitating health problems including Type 2 diabetes, sleep apnea, hypertension, heart disease, low self-esteem and depression.

Childhood obesity also increases the risk of potentially fatal health issues later in life. Obese children will most likely become obese adults.
